

## Swivel Bather for Corner Baths

**The Swivel Bather is a turning bath seat that allows easy transfer over a bath. The user sits on the seat from the side of the bath and then swivels over the bath for a wash or shower.**

**The base frame of the Swivel Bather for Corner Baths has extendable tubes that are easily adjusted to fit most corner baths.**

The seat dimensions are the same as the Standard Swivel Bather. The height of the seat above the bath is 3½" (90mm). All metal parts are stainless steel.

The seating unit has a plastic seat which is easy to clean and has small drainage holes.

The base frame has non-slip plastic ends which rest on the bath and a positioning screw to prevent movement.

The seat locks in both the transfer and bathing positions. The locking lever is located on the right hand side of the seat but all models can be requested with the locking lever on the left hand side.

This model is also suitable for very wide baths 32" to 47" (810 to 1200mm).

### Dimensions

These apply to both mild steel and stainless steel models

Seat width:	17½"	(445mm)
Backrest height:	14"	(355mm)
Seat depth:	16"	(405mm)
Width between arm rests:	19"	(485mm)
Seat height above side of bath:	3½"	(90mm)
Distance between arms of base unit (measured at outside edge of arms)	21"	(535mm)

Each arm of the base unit can be independently extended from 32" to 47" (810 to 1200mm).

Weight of base unit including extension tubes is 14.5 lbs (6.5kg).

The extendable support tubes are separately adjusted and locked with a screw and nut.

All Swivel Bather accessories can be used with the Swivel Bather for Corner Baths

This product is made of stainless steel and is suitable for long term use.

Suitable for users up to 160kg (25 stone).

**Safety Note:** A minimum of 1¼" (30mm) of each arm must rest securely on each side of the bath
